

Intermediate Term Taxable

Separately Managed Account · Taxable Fixed Income

Inception Jan 1, 2013

Benchmark Bloomberg US Gov: Intermediate

INVESTMENT APPROACH

Bernardi's taxable bond strategies heavily favor taxable municipal obligors. These securities historically provide high levels of security with attractive spread to treasuries and some corporate issuers. We further diversify portfolios with exposure to US treasuries, agencies, CD's and sometimes investment grade corporate issuers. As value investors, we typically allocate away from benchmark-heavy names and target small-to-mid-sized taxable municipal issuers within the essential purpose and revenue sectors. In a market dominated by large investment managers, we believe these often overlooked obligors offer relatively attractive yield and high levels of credit security.

COMPOSITE METRICS

COMPOSITE AUM · \$29,717,351

Average Maturity	9.30 yrs
Effective Duration	6.70 yrs
Average Coupon	3.96%
Avg. Yield to Worst	4.53%

STRATEGY OVERVIEW

The Intermediate Term Taxable strategy is an actively managed strategy appropriate for investors seeking current taxable income and capital preservation. The goal of the strategy is to produce superior risk adjusted returns relative to the Bloomberg US Government: Intermediate Bond Index. The strategy consists of fully discretionary, separately managed account (SMA) portfolios and holds mostly taxable securities.

Disclosure: Information on this page represents supplemental information to the GIPS Report. Nothing in this document represents a recommendation of any particular strategy, security, or investment product. Performance returns are shown net of management fees. Past performance is not indicative of future returns. Composites may contain accounts of Bernardi Asset Management LLC and may include securities subject to the federal alternative minimum tax. Composite may include callable bonds and if so, yield is calculated on a yield to worst basis. Please contact us if you would like a listing of historical recommendations. Composite performance is based upon the aggregate of the fixed income performance of a group of managed portfolios, which represent a particular style of management. It does not represent the performance of any one portfolio. Index performance is based upon the performance of an independently published grouping of securities. The indices cannot be invested in directly, but provide a representative comparison to the performance of our composites. The index used is as follows: Bloomberg US Government: Intermediate Bond Index. An investment cannot be made directly in an index. Composite inception is 01/01/2013.

2017	159.10	20.24	14	3.14%	1.14%	1.56%	1.78%	2.19%
2016	142.96	14.24	≤5	2.23%	1.05%	0.35%	2.06%	2.27%

The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period using net returns. The three-year annualized standard deviation is not presented due to less than 36 months of composite and benchmark data.

Intermediate Term Taxable Composite is comprised of fully discretionary, separately managed account (SMA) portfolios. The composite contains portfolios holding mostly taxable securities and for comparison purposes is measured against the Bloomberg US Government: Intermediate Bond Index. In July 2025, the index was changed from the Bloomberg U.S. Government/Credit Intermediate Index to the Bloomberg US Government: Intermediate Bond Index for all periods. The Bloomberg US Government: Intermediate Bond Index is comprised of the Intermediate US Treasury and US Agency Indices. It includes US dollar-denominated, fixed-rate, nominal US Treasury and US agency debentures with 1 to 10 year maturities. The composite was created January 01, 2013. The composite inception date is January 01, 2013. The minimum account size for inclusion in the composite is \$100,000.

Bernardi Asset Management, LLC (BAM) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. BAM has been independently verified for the periods 01/01/2013 through 12/31/2025. The verification report(s) are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Bernardi Asset Management, LLC ("BAM") is a registered investment adviser with United States Securities and Exchange Commission in accordance with the Investment Advisers Act of 1940. BAM began managing assets in February 2000. The firm's list of composite descriptions is available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Past performance is not indicative of future results.

The U.S. Dollar is the currency used to express performance. Returns are presented net of fees and include the reinvestment of all income. Net returns are reduced by all actual fees and transaction costs incurred. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year using net returns. Policies for valuing investments, calculating performance, and creating GIPS Reports are available upon request. The investment management fee schedule for the composite is 0.40% for accounts \$2 million or smaller, 0.35% for accounts between \$2-5 million, 0.30% for accounts between \$5-10 million, 0.25% for accounts between \$10-15 million, and 0.20% for accounts over \$15 million. Actual investment advisory fees incurred by clients may vary.
